

NGUYEN QUANG HUY

MIDDLE FULLSTACK DEVELOPER

CONTACT

- 0367 835 670
- nqhuy.dev20@gmail.com
- Ho Chi Minh City, Vietnam
- <https://nqhuydev.cloud/>

TECHNICAL SKILLS

- Languages:** HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript
- Frontend:** React.js, Next.js (Pages Router & App Router), React Native(RN CLI)
- Styling:** Tailwind CSS, SCSS(CSS Preprocessor), Styled Components.
- UI Library:** MUI, AntD, Shaden/UI.
- State Management:** Redux (Toolkit, Thunk, Saga), Zustand, TanStack Query.
- Form state management:** Formik, React-Hook-Form, Yup, Zod.
- Backend:** Node.js, Nest.js, Spring Boot 3, PostgreSQL, MySQL, Redis

PROFILE

Highly motivated and proactive Software Engineer with 4+ years of professional experience in full-stack web development. Transitioned from a deep Frontend background (ReactJS, Next.js) to building robust, scalable Backend services with Node.js and NestJS.

An AI-forward developer who embraces AI tools (Cursor, Claude, Copilot) as productivity multipliers to accelerate development velocity while strictly applying validation guardrails, architectural patterns, and quality controls to ensure production-grade code. Proven track record of owning features end-to-end and delivering high-performance solutions for complex systems.

WORK EXPERIENCE

- Full-Stack Developer IVC (ISB Vietnam)

05/2022 - Present
- Project: KPI Management

03/2026 - NOW
- Developed an internal KPI management system using Vue 3, Vite, TypeScript, Pinia, and Tailwind CSS for the frontend.
 - Implemented backend services with Spring Boot 3, Java 21, MyBatis, and PostgreSQL.
 - Designed REST API endpoints and role-based access control for GM, PM, Leader, and Member.
 - Integrated authentication with JWT and secure data handling using HashiCorp Vault.
 - Built local development and deployment workflow with Docker Compose, including PostgreSQL, Redis, Vault, and pgAdmin.
 - Managed API logic, data mapping, and SQL queries through a structured service/controller/mapper architecture
- Project: FaceDB

01/2026 - 03/2026
- Built a real-time web-based camera application using ReactJS and Material UI (MUI) for seamless document scanning and processing.
 - Integrated Google MediaPipe to implement real-time liveness detection and document boundary tracking directly in the browser.
 - Architected high-performance state management using Jotai (Atom-based state) libraries to efficiently handle high-frequency data updates from camera streams without rendering bottlenecks.
 - Engineered robust RESTful APIs utilizing NestJS and Node.js to handle the processing and persistence of OCR-extracted ID card data.
 - Tech Stack: ReactJS, Material UI (MUI), Atom (Jotai/Recoil), Google MediaPipe, OCR, Node.js, NestJS.

- **Testing:** Jest, React Testing Library, Playwright.
- **Tooling:** Webpack, Vite, Rsbuild, Docker, Git, Jenkins, ESLint, Prettier, Biome.
- **AI-Assisted Development:** Cursor Pro, Claude Code Max, Gemini CLI.

Project: TAKEX

01/2025 - 12/2025

- Developed a responsive web application using Vue.js framework to manage modular data flows.
- Implemented complex screen logic and UI interactions using Vue components, computed properties, and watchers.
- Managed application state and component communication using Vuex.
- Optimized form inputs and dynamic rendering using custom directives.
- Tech Stack: Vue.js, Vuex, JavaScript, HTML5, CSS3, Vue CLI.

Project: NEOHOPS (Legacy Migration)

06/2024 - 01/2025

- Analyzed and migrated a legacy Visual Basic (VB) system into a modern web-based application using Angular.
- Implemented business logic and reusable UI components with TypeScript.
- Wrote comprehensive unit tests using Jasmine and Karma to ensure system reliability.
- Collaborated with the backend team for API integration and handled data streams using RxJS.
- Tech Stack: Angular, TypeScript, RxJS, SCSS, Jasmine, Karma.

Project : Fujia Banking (E-commerce)

05/2022 - 06/2024

- Built a multifunctional e-commerce web application using ReactJS, focusing on complex ordering systems and dynamic forms.
- Architected global state management using Redux to maintain UI consistency across user roles.
- Handled asynchronous side effects and complex API integrations using Redux Saga Middleware.
- Optimized component rendering and lifecycle management to improve application performance.
- Tech Stack: ReactJS, Redux (Saga), JavaScript, Next.js, Axios.

The New Tech

06/2021 - 04/2022

Project: CRM System

- CRM System (The New Tech): Developed a dashboard for user management and reporting using ReactJS, TypeScript, and Next.js.
- Pharmacy & Popeyes E-commerce: Built admin interfaces for managing products, brands, categories, and order tracking using ReactJS and SCSS.
- Logistics Dashboard: Created statistical charts and order creation modules using ReactJS and Ant Design.

LANGUAGES

English: Professional Working Proficiency (Capable of reading technical documentation, writing clean code comments, and communicating effectively in daily stand-ups).

PERSONAL PROJECT

CRM - Dashboard

- Architected and developed responsive dashboard interfaces featuring multiple complex layouts. Handled dynamic routing, state management, and real-time user interactions using ReactJS and TypeScript.
- Project : <https://my-workroom-dashboard.vercel.app/dashboard>

Movie Film

- Implemented secure user authentication (Login/Logout) utilizing NextAuth.
- Built API routes with Next.js and managed database interactions efficiently using Prisma Client.
- Use clientApi of NextJS
- Project URL: https://github.com/huy1231a/Movie_Film

Akademi Dashboard

- 7 layout and any events base .
- Project URL: <https://github.com/huy1231a/Akademi>

EDUCATION

Ho Chi Minh City University of Technology
GPA: 3.8 / 4.0

2018 - 2022
